SUMMARY

Full-stack engineer with 5+ years building and shipping production SaaS platforms end to end — from multi-tenant architecture and role-based access control to booking engines, payments, and AI-powered analytics. Architected a workflow platform that replaced Jira and scaled to 820+ users across 17 countries and 100+ enterprise clients. Equally strong across React / Next.js on the frontend and Node.js / PostgreSQL on the backend, owning features from database schema to UI and deployment.

FLAGSHIP PROJECT

AuraDash — Multi-Tenant Appointment & Business-Management SaaS

Jan 2026 – Present

React · Node.js · PostgreSQL · Docker · Google OAuth · MercadoPago

- Architected and built a multi-tenant SaaS (CRM, inventory, finance, and workflow automation) with role-based access control (RBAC) and full per-tenant data isolation.
- Engineered a conflict-aware, timezone-aware booking engine handling complex scheduling logic across tenants.
- Integrated AI natural-language analytics with real-time dashboards, two-way Google Calendar OAuth sync, MercadoPago payments, and bulk Excel/CSV import.
- Owned the full stack and deployment pipeline across Render, Vercel, and Neon.

PROFESSIONAL EXPERIENCE

Sistran — Enterprise Management Platform

Jun 2022 – Jul 2025

React · JavaScript · CSS · REST APIs

- Sole frontend developer for a workflow platform that replaced Jira, reaching 100% adoption across 820+ internal users in 17 countries.
- Drove rapid adoption by rolling the platform out to 100+ enterprise clients in 2 months, eliminating ~\$3K/license fees per client (~\$300K+ in savings) and opening new revenue.
- Engineered 380+ configurable workflows with dynamic state management and task tracking for diverse operational processes across global teams.
- Designed and implemented role-based systems for 9 user types, managing complex permissions and improving cross-functional efficiency.
- Architected a scalable, multi-tenant React frontend that let the platform evolve into a globally adopted SaaS product.

Scalabl — Educational Platform

Jan 2022 – Jun 2022

JavaScript · jQuery · PHP · CSS · REST APIs

- Rebuilt the content-consumption experience with a new video playback and progress-tracking system, increasing course completion rates by 35% across a platform serving 2,500+ professionals.
- Optimized frontend structure and navigation to improve retention and engagement across a platform operating in 50+ countries.

ADDITIONAL PROJECTS

Más Repuestos — Multi-Vendor Marketplace (Mobile)

Oct 2025 – Mar 2026

Flutter · Firebase · REST APIs

- Built and launched a multi-vendor marketplace app in 4 months, connecting buyers, sellers, and delivery drivers with role-based workflows for search, comparison, purchasing, and delivery.
- Architected core marketplace systems (product-vendor relationships, purchase flows) and shipped to Google Play with real user transactions (App Store in review).

DogCo — Dog-Walking Marketplace

Oct 2025 – Present

React · TypeScript · Firebase · JavaScript · CSS

- Building a two-sided marketplace connecting pet owners and dog walkers, with authentication, booking flows, and real-time data syncing via Firebase.
- Designed the role-based system (owner/walker) and interaction logic for scalable user coordination.

LACEV / APASUR — Paleontology Excavation Platform

Sep 2025 – Oct 2025

React · i18n · CSS · REST APIs

- Developed a multilingual campaign platform for a national paleontology excavation, with dynamic content, modular components, and interactive sections.
- Supported international visibility of major discoveries (new dinosaur species and the best-preserved dinosaur egg on record), with direct involvement in field excavation.

TECHNICAL SKILLS

Frontend: HTML · CSS · JavaScript · TypeScript · React · Next.js

Backend & Data: Node.js · PHP · Prisma · PostgreSQL

APIs & Integration: REST APIs · Axios · Firebase · OAuth · MercadoPago

DevOps & Tools: Docker · Git · GitHub · Render · Vercel · Neon

Mobile & Design: Flutter · Figma · Canva

AI: Claude Code · Anthropic API · n8n · Gumloop

Languages: English · Spanish

EDUCATION

Computer Science & Programming — 4.5 years of combined study

Universidad Tecnológica Nacional (2024) · Da Vinci Instituto (2023) · Teclab Instituto Técnico Superior (2019–2021)

Transitioned into full-time development in 2022.
